

We are pleased to announce we have just been awarded the opportunity to serve as a technology partner with the Intelligent Pipeline Integrity Program (iPIPE) consortium in North Dakota. The focus of the consortium is to contribute to the advancement of emerging technologies for the prevention and detection of pipeline leaks in gathering systems. The group of iPIPE consortium partners includes:

We will be working closely with consortium partners over the coming months.

Stay tuned for more updates!

The iPIPE Partnership is led by the Energy & Environmental Research Center at the University of North Dakota. To find out more, click here: <https://www.ipipepartnership.com/>
